Greetings To All!

Season of 1927

"Soon will the high Midsummer pomps come on,
Soon will the musk carnation break and swell,
Soon shall we have gold-dusted snapdragon,
Sweet William with his homely cottage smell,
And Stocks in fragrant blow;
Roses that down the alleys shine afar,
And open, jasmine-muffled lattices,
And groups under the dreaming garden-trees,
And the full moon, and the white evening star."

MATTHEW ARNOLD.

Our effort to create gardens with atmosphere, met with such encouraging response, that we feel we have enlarged our field of usefulness.

Our idea of a garden is a place primarily for relaxation; the design so in keeping with its surroundings, that one can read, write, or pour tea, in complete enjoyment of the picture.

We have worked over plans of old English and French gardens, and have grown many of the plants which they use so effectively, provided we find them hardy. We use the old-fashioned "free" roses, such as Moss, Damask, Provence, and Cabbage, to supply perfume, and a home-like atmosphere, and vines and shrubs with the same purpose in mind.

Cherry Meadow Gardens are filled with rows and rows of promising plants for those who wish to buy and do their own planting.

Plants for the rock-garden, from seeds of M. Henri Correvon, and from seeds of English plant hunters.

There are quaint garden sorts also, from strains of seeds, chosen always after careful experimentation.

We shall be glad of the advent of spring as a time to welcome friends — both old and new.

Cordially yours,

EDWARD AND OLIVE BELCHES.
CHERRY MEADOW GARDENS
Our offerings in annuals were in great demand this past season, hence we shall again grow the choicest items, all from selected strains of seeds. Many from England, a few from France, and some especially satisfactory things from American growers.

Last season we were called upon to fill a number of complete "picking gardens," which our clients considered most satisfactory.

All annuals are sold in trays containing twelve plants. We do not sell broken dozens, but we shall have a number of trays made up of assorted colors of a variety to please those who prefer mixtures.

ANAGALLIS (Pimpernel): Our visitors all approved of this. A fine edging plant with clear sapphire blue flower. 50 cents per dozen.

ARCTOTIS GRANDIS: White daisy-like flower with slate-blue center. 50 cents per dozen.

ASTER: Sutton's Mammoth, in white, shell-pink, salmon-rose, purple. Heart of France, the popular ruby-red French aster. Southcote Beauty, imported from England. Those who appreciate the "old-timey" single aster, so artistic for cutting, will want this variety. Pink, mauve, white. All asters 50 cents per tray.

BARTONIA AUREA: Low-growing plant with yellow bloom. 50 cents per dozen.

CALÉNDULA: Lemon, pure gold and Ball's celebrated strain in orange. 50 cents per dozen.

CENTAURÉA (Cornflower): The true double bright blue bachelor's button. 50 cents per dozen.

COSMEA (Cosmos): Early flowering in white, pink, ruby-red. 50 cents per dozen.

DIMORPHOTHÈCA (Star of the Veldt): Orange, Lemon Queen (new), and hybrids in quite lovely shades of salmon and buff. 50 cents per dozen.

HELIOTROPE: We grow only the rich purple, dwarf, sweet-scented variety. $1.00 per tray, 25 cents each for larger potted plants.

LARKSPUR: Sky-blue, dark-blue, lilac, soft pink, shell-pink. The lilac was especially admired last season. 75 cents per dozen.
LAVATÈRA (Sutton’s Loveliness): A most beautiful addition to the flower border. Glowing rose-colored flowers on compact, shrubby plant. Very striking and superior to that usually offered. 75 cents per dozen.

MARIGOLD (African Double): We offer a beautiful primrose-yellow marigold unlike any other shade in this flower, and as far as we know, procurable only in England. It combines effectively with slate-blue annual poppies, with darkest red dahlia, or with any blue or purple perennials. We have the French marigold in bicolor and brown. All marigolds 50 cents per dozen.

MIGNONETTE: Old-fashioned, sweet-scented. Spot this in, for its perfume, among petunia, or with our dwarf Drummond phlox, “Pink Beauty.” 50 cents a dozen.

NEMÈSIA: In Scotland this plant grows as freely as nasturtium. It is important to have a reliable strain. We are offering a fine strain labelled blue, untried by us, so we cannot state precise shade. We also have a very choice mixture containing many gay colors. 75 cents per dozen.

NICOTIÀNA AFFINIS: White tobacco-plant for evening scent. 50 cents per dozen.

PANSY: See Spring Garden Offerings.

PENTSTÈMON: We list this perennial as an annual, because it is not reliably hardy. About like snapdragon. Massed in the border in groups of not less than twelve it is fine. “Middleton Gem”: rich pink with white throat. Pure giant white. $1.00 per dozen.

PETUNIA: Demand for special type and color petunia is very exacting, and rightly so. We, therefore, have tried out and offer an English “Superb Violet” and a “Bedding Blue,” finding both of these beautiful and quite uniform. 75 cents per dozen. We have a peculiar red petunia which was ordered a year ahead on sight. Indescribably artistic. $1.00 per dozen, 25 cents each in pots. For those whose choice is pink, the old standby Rosy Morn. The character of the Balcony petunia is correct for window boxes and informal garden effect, and in this variety we offer Balcony white and Balcony blue. 50 cents per dozen.

PHACÈLIA CAMPANULÀRIA: An attractive edging plant with blossom of “Yale” blue. 50 cents per dozen.

PHLOX DRUMMONDI: If we could say we have a specialty, this might be it. Because it is an entirely satisfactory plant. Our strain of seed
from England has produced reliably uniform colors: Brilliant salmon-rose, which radiates; delicate pink, fine rose pink; deep violet, good; cream-buff, wonderful with salvia patens; ivory white, we admire this especially. We have a dwarf variety "Pink Beauty" — and it is! We have bloomed a sample lot. Perfect for edging. All Phlox Drummondii 50 cents per dozen.

SALPIGLOSSIS: It is safe to buy this in mixture, since all shades blend. We carry in separate color: Light blue and gold, violet-blue, primrose-yellow, and Michell's scarlet and gold, which is a beauty; in effect, burnt orange. 50 cents per dozen.

SALVIA (Pink Gem): We are offering this pink salvia on the "say-so" of a friend who thinks it most attractive. We have not grown it before, but we think it might be popular. A few scarlet to meet a demand. 50 cents per dozen.

SNAPDRAGON: We took many orders for this last fall from visitors who thought we had a fine strain: Snowflake, a wonderful white; Golden Chamois, apricot-shaded orange with soft pink throat; Yellow King Improved, primrose-yellow; Cattleya, rosy-lilac; Evening Sky, shell-pink shaded buff; Cerise King, cherry-rose with white throat; Silver Pink, well-known pure pink; Purple King — seedsmen call this purple, growers call it darkest garnet. All snapdragon, 75 cents per tray, 25 cents each out of pots.

SWEET SULTAN: Good cutting flower in mixture. 50 cents per dozen.

SUNFLOWER (English miniature): Straw color with dark center, moderate-growing plant, a great addition to the garden. We always have repeat orders for this. 50 cents per dozen.

VERBÉNA: The verbena is extremely satisfactory for a late summer and autumn cut-flower — furnishing a needed flash of color, even after light frosts. The trailing tendency makes it a good wall or banking plant, or for edging a path. We have located a strain of verbena so excellent that we shall feature it this season: Mammoth fancy blue, mammoth fancy yellow, mammoth fancy pink, mammoth pure white, pink shading to salmon, deep scarlet. 50 cents a dozen, 25 cents each out of pots.

ZINNIA: Queen of the Roses, salmon-rose — beautiful. Delicate pink, white, buff, yellow, orange, and scarlet. Many of our visitors remarked that they had never seen anywhere such superb zinnias as ours. 50 cents per dozen.

Scarce. $4.00 per dozen. Laphami, slightly different in shade, and blooming just as the “Spring Dream,” is through. $3.00 per dozen.

Desirable rock plants are designated by the marginal asterisk.
We believe that Liberty H. Bailey’s *Cyclopaedia of Horticulture*, and Mabel Cabot Sedgwick’s *Garden Month by Month*, which two agree, should be sufficient authority to establish a criterion on which to base a uniform pronunciation of plant names. Furthermore, these two American authorities appear to be at variance with British authorities in but a negligible number of items.

Wishing to contribute our share toward correcting a deplorable diversity of pronunciation among both professional landscapers and the trade, we are this year emulating Barr & Sons of London, in accenting the proper syllables in our catalog, our authority being Bailey and Sedgwick.

Our stock of certain rare items is in limited supply, while a few things will not be marketable till fall. Then, too, we have some perennials in process of growth which we cannot offer until much later on, and consequently have not listed in this catalog.

It will be noted that we are making a minimum charge of thirty cents for single plants, because of labor involved.

Six plants are at the dozen rate.

*Cash With Order*

The expense of bookkeeping for a large quantity of orders whose individual amounts are not great would be prohibitive.
The Shop

Our shop enables us to execute our garden work with appropriate features which lend distinction.

Mr. Belches designs and supervises the building of treillage, garden shelters, seats, tea tables, bird baths, and sundials, in either wood or cement. Also stepping stones for artistic garden walks or lawn paths.

Business Hours

Our hours of business are from nine in the morning till six in the afternoon. Sunday we observe as a day of rest.
